

“Plan for Coverage of Water Supply for Public/ Community Toilet–Tamilnadu – Devakottai Municipality”

• **Preamble**

- No of Households in the city is 13582
- No of Households having with IHHL 12254
- No of Households provided with IHHL 1328 under SBM
- No. of Households not having space for construction of IHHL is 94 and that Households have been accessed with Community Toilet
- No. of Community toilets is 10 Nos (94 seats)
- No. of Public toilets is 2 Nos (21 seats)

1. Current Status – Base line indicator for the year 2020-21

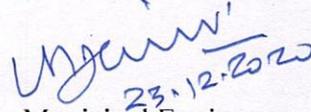

At present Devakottai Municipality has achieved ODF status. All the 2 numbers of Public Toilets and 10 numbers of Community Toilets are constructed with Bore well fitted with Motor and Pump units to provide water supply.

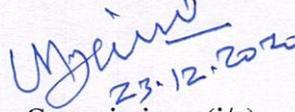

The toilets are constructed with facilities such as electrical, lighting, ventilation and disposal of waste by providing septic tank.

2. Action Plan to provide continuous water supply facility for Public / Community Toilet

- ✓ All the community /public toilets are provided with Bore well with motor-pump facilities.
- ✓ A plumber has been specifically allocated to visit all the Public / Community Toilet to ensure the water supply availability and to attend the fault on daily basis.
- ✓ In case of any ground water depletion during the summer, water supply through lorry will be arranged.
- ✓ Planned to construct a water sump near the toilets to ensure the water supply on 24 x 7 basis.
- ✓ Proposed to improve the 10 % of Community Toilets on Aspirational Basis to achieve ODF +before the year 2021-22.

Target for the year			
2021-22	2022-23	2023-24	2024-25
ODF +	ODF +	ODF +	ODF +
