Points Discussed :

- The Municipal Commissioner, Tiruchengode Municipality explained the outline of the Proposed Improvement of Roads with SWD under TNSUDP.
- The Municipal Engineer explained that Tiruchengode Municipality has a total road length of 127.700 Kms. Due to implementation of Water Supply Improvement Scheme and Natural Calamities many have been damaged and it should be laid again.
- The Municipal Engineer explained that in this project 31 Bituminous roads of length 13.54 Kms has to be renovated. The total SWD of length 5.840 Kms has to be renovated newly within the Right of way of 21 roads in this project and it will not require any land acquisition. For remaining roads SWD already exists.
- Various features such as Residences, Schools, hospitals, religious features, water bodies (lakes) are present near the proposed roads. But no tree cutting and waste handling involved in the project.
- River crossing does not occur in this project.
- During construction management measures will be followed to ensure safety and project will be implemented without any inconvenience to the public.
- All the proposed roads belongs to Tiruchengode Municipality. So there is no need to sought permission of clearance from any other department for laying of roads.
- The roads and storm water drains will laid on right of way and there is no need for encroachment/ acquisition of land. If any impacts indentified / encountered during the implementation of the project will be mitigated as per Social Safeguards.
- The stake holders accepted the facts and the meeting had concluded.

Commissioner
Tiruchengode Municipality.
